What is the AMAs buying program?

table of contents

Henry Schein and the AMA have partnered with GroupSource to bring you even more competitive savings on all the medical supplies that you love, as well as brand-name and generic pharmaceuticals, from one convenient source. With this change, you will now gain access to hundreds of vendor contracts offering increased discounts on products and services that physicians purchase for daily use. This new program will leverage the collective purchasing power represented by thousands of physician groups, from single physician offices to large multi-specialty clinics, representing over $40 billion in purchases, and remember, you don't need to have AMA Membership to take advantage of these fantastic cost savings.

Discover through this new partnership how you can start benefiting today from this unique service offering:

Henry Schein Value

Trusted Advisors:
Our knowledgeable team can help you in navigating today's changing health care landscape through: Revenue enhancement, cost containment, staff training, technology & value-driving products and services.

Price Integrity:
With the new AMA Buying Program your pricing will be extremely competitive and we will be continually working on your behalf to develop this purchasing plan and help deliver best value for your patients.

Guaranteed Fast Delivery:
Orders received by 5PM local time are shipped the same day. Your products will arrive within 24-48 hours in most areas.

Vaccines, Pharmaceuticals, and Diagnostics:
We supply every adult and pediatric vaccine recommended by the ACIP. In addition, we can fulfill flu vaccine needs with our Worry-Free Guarantee Influenza Vaccine Program.

Solutions Hub:
We offer a vast selection of solutions to help you achieve your practice goals. Our commitment to helping you grow includes focusing on key service areas including revenue generation, cost containment, best practices and partnerships.

AMA Value

The American Medical Association has expanded the MVP Program to bring you more resources and savings that fit you and your practice.

Mailing Savings Program:
AMA value program members save up to 36% with UPS® on a broad portfolio of UPS services, including air, international, ground and freight shipping.

Educational Tools:
AMA members save up to 30% off Kaplan's select USMLE, COMLEX, and Internal Medicine courses.

Hotels & Travel:
Discounts up to 10% off published rates with periodic and seasonal specials. Hyatt Gold Passport® provides exclusive benefits and services at Hyatt hotels worldwide.

Credit Cards, Auto Loans & Personal Loans:
Exclusive credit cards featuring rich rewards on travel, cash-back or low APRs.

Computer & Technology Products:
From 5% to 30% off small-business technology and equipment to run your practice.

Car Rental:
Up to 25% off domestic and international car rentals and Fee-waived membership in 3 Hertz Gold Plus Rewards.

GroupSource Value

GroupSource, in partnership with Henry Schein, is dedicated to helping you save money. GroupSource negotiates and executes thousands of individual contracts each year. The savings accrued allows our clients to dedicate more of their resources directly to patient care, hiring additional doctors and nurses, and purchasing more advanced products and technology. As part of the member buying group you will be able to access savings across numerous contracts including:

- Medical Supplies
- Office Supplies
- Printing
- Cellular Phone Service
- Physician Recruiting
- Publications
- Telecommunications
- Office Equipment
- Lighting Supplies
- Data Storage

Frequently Asked Questions

What is the AMA buying program?
The AMA's buying program was launched by Henry Schein and the AMA to reduce operating expenses and enhance practice efficiencies for AMA members. The AMA buying program is powered by GroupSource, one of the nation's largest group purchasing organization.

What is a Group Purchasing Organization (GPO)?
A GPO is a cost management service designed to help businesses reduce operating costs. Strategic vendor contract sourcing and collective bargaining lowers total supply and service acquisition costs through a combination of lower prices, labor realignment, reduced carrying costs, and payment term discounts.

What are the benefits of the AMAs buying program?
With the AMA's EXCLUSIVE medical supply program, members have access to a comprehensive, high-quality, high-value portfolio of physician office supplies, in addition to numerous value added services which Henry Schein, the AMA, and GroupSource can offer.

What is the difference between the AMAs buying program and other sales plans?
Most GPOs are focused on acute care, but in recent times they have begun marketing to the non-acute care centers. However, by using the buying power of the AMA program, Henry Schein in partnership with GroupSource is able to negotiate superior pricing and terms on products and supplies which can help you run a successful practice..

What is the cost to participate in the AMAs buying program?
There is no fee to join and take advantage of these fantastic savings. It is absolutely free.

Is there a time commitment? How long is my membership?
There is no time commitment, your membership in the AMA's buying program will continue until you stop purchasing through the program.

Does the AMA buying program only cover clinical products for my practice?
No, the program contracts extend over many of the products, services, and equipment necessary to run your practice. This program aligns with many partners to provide you with a wide array of value-added solutions.

NEW REPORT:

2014 Work/Life Profiles of Today's U.S. Physician

Work and lifestyles differ by age:

Where do you fit?

Do you work longer hours than your peers?

How do your retirement savings compare?

Is your debt load higher or lower than other physicians?

What hobbies and activities do you share with other physicians?

Are your practice plans the same as your peers' plans?

Answers to these questions and many more can be found in the newly released report, the 2014 Work/Life Profiles of Today's U.S. Physician at *amainsure.com/worklife2014*. The report is based on a national survey created and conducted by AMA Insurance to better understand physicians, ages 30-69, and their work and lifestyles, and life choices.

No 'one' work/lifestyle profile

While the report produced a wide range of insights, the core finding is that there really is no 'one' profile for physicians when it comes to lifestyle. Rather, there are many and they relate specifically to different age groups - under age 40, ages 40-59 and ages 60-69 – with some gender differences.

Three profiles by age – compare yourself to your peers

To better understand how you compare with your peers, we have created three brief summaries of report results on key topics, by age group.

See page three of this article to check your age group profile to see where you fit.

AMAI Work/Lifestyle Trivia Quiz
Test Your Knowledge About Your Peers

1. What is the most common medical school loan debt carried by physicians under age 40?

A. $75,000-100,000
B. $100,000-150,000
C. $150,000-200,000

2. Which age group of physicians is most likely to have physician spouses?

A. Physicians under age 40
B. Physicians ages 40-59
C. Physicians ages 60-69

3. What is the social media site used most by physicians?

A. Twitter
B. Facebook
C. LinkedIn

4. What is the social media site used most by female physicians under age 40?

A. Facebook
B. Pinterest
C. Google+

5. What do physicians worry about most related to personal finance?

A. Protecting estate from taxes
B. Retirement savings
C. College fund savings

6. How much more retirement savings do physicians over age 60 say they'd like to have?

A. $200,000
B. $500,000
C. $1,000,000+

7. Which schedule do most physicians work?

A. Day
B. Night
C. Combination of day, night

8. How many hours typically do physicians work weekly?

A. 40-60 hrs
B. 60-75 hrs
C. 75-80 hrs

9. What products or services do physicians purchase most online?

A. e-books
B. Travel services
C. Clothing
D. Digital songs

10. Which technology/devices are most popular with physicians?

A. Windows PC tablet
B. Android phone
C. iPad
D. iPhone

Answers: 1.C. 73% of physicians under physicians under age 40 carry a debt of $150,000-200,000. **2. A.** Physicians under 40 are more likely to marry physicians than any other age group. **3. B&C.** Facebook is most popular with physicians under 40 (71%) and about a quarter of all physicians use LinkedIn. Male physicians, especially under age 40, are more likely to use LinkedIn than female counterparts. **4. A.** 76% of female physicians under 40 use Facebook vs. 66% of males. **5. B.** Retirement savings is the top personal financial concern of physicians of all ages (70% across all ages). **6. C.** 44% of physicians ages 60-69 say they would like $1,000,000 or more in addition to what they have already saved. Two-thirds of physicians under 40 say they want incremental savings of $200,000-500,000. **7. A.** Most (70%) work during the day; 1% works at night. **8. A.** Most work 40-60 hours/week, but nearly 25% work 60 to 80+ hours per week. **9. B&C** score the highest in all age groups. **10. C&D.** Physicians are heavy iPhone and iPad users.

because DOCTORS are different

AMA INSURANCE

Compare yourself to your peers. (continued from previous page)

	PHYSICIANS UNDER AGE 40	PHYSICIANS AGES 40-59	PHYSICIANS AGES 60-69
GENDER:	There is no gender gap in this group versus other age groups. It is reflective of the times, i.e., more women are attending medical school than in the past.	The gender split is 39% female, 61% male physicians in this group.	The gender split for this group is 22% female, 78% male physicians.
MARRIAGE/ FAMILY	**75% ARE MARRIED** with 26% married to a physician. Over half are married to a non-healthcare professional or full-time homemaker. • They are more likely to marry a physician than other age groups. • Two-thirds of them own a home; 20% own a second home.	**82% ARE MARRIED.** One in four female physicians is married to a physician. • Half are married to either a non-health care professional or a full-time home maker. • 90% own a home and 36% own a second home.	**84% ARE MARRIED.** Only 13% are married to a physician. • 95% own their homes, with over 40% owning a second home.
WORK	**40% WORK BETWEEN 40-50 HOURS PER WEEK** with 28% working days/nights • 22% of female physicians with children at home work less than 40 hours per week. • Nearly half of physicians in this age group would like to work fewer hours.	**70% WORK THE DAY SHIFT** with 29% working days/nights. 1% works nights. • Over one-third work 40-50 hours per week; 26% work 61-80+ hours per week • Over half would like to work fewer hours.	**33% WORK 40- 50 HOURS PER WEEK** and 76% work days. • Nearly 50% would like to work fewer hours, but 39% are happy with their current schedule.
PRACTICE PLANS	**IN THE NEXT 5 YEARS, 23% PLAN TO CHANGE EMPLOYERS.** • 69% plan to continue practicing as they do now.	**IN THE NEXT 5 YEARS, 13% PLAN TO CHANGE EMPLOYERS.** • 70% plan to continue practicing as they do now.	**IN THE NEXT 5 YEARS, 44% PLAN TO RETIRE.** • 44% will continue to practice. • 7% plan to change employers
PERSONAL FINANCE	Top financial concerns are retirement savings followed by investment strategies and college fund savings. • **RETIREMENT:** 54% say they are behind in saving for retirement. • 65% said they'd like to have $200-500,000 more in savings at this point in their life. • **MEDICAL SCHOOL DEBT:** 73% graduated from medical school with debt. 47% of them carry a debt of $100,000-200,000 with 23% being over $200,000 in debt. 83% are still paying off the debt today. • **COLLEGE SAVINGS:** 59% have a college savings plan in place.	Retirement savings is the top personal financial concern, followed by managing retirement options, investment strategies, protecting money from taxes and long-term care. • **RETIREMENT:** Over half are behind where they would like to be in retirement savings; only 6% consider themselves 'ahead of schedule.' • 41% would like to have $500,000-1,000,000 more in retirement savings at this point in their career. • **MEDICAL SCHOOL DEBT:** More than 60% had medical school debt. • 41% had $50K-$150k in debt; 41% had less than $50k in debt. • 25% are still paying off their loan. • **COLLEGE SAVINGS:** 65% have a college savings plan.	Retirement savings is the top personal financial concern followed by protecting estates from taxes and managing retirement options. • **RETIREMENT:** Asked about more retirement savings, 44% would like to have $1,000,000+ more than what they have saved now. • Only 7% consider themselves 'ahead of schedule' in savings at this point in their career. Nearly half consider themselves 'behind where I would like to be.' • In hindsight, 27% would have spent more time learning about financial planning.
TOP ACTIVITIES/ HOBBIES	Half of physicians under age 40 run or jog, with 25% enjoying bicycling and 24% camping/hiking. • Over half are avid book readers and half list gourmet cooking as a top hobby.	35% enjoy bicycling; 36% run or jog; 24% camp and/or hike. • More than half are avid book readers. • Gourmet cooking and owning a dog are two other key interests.	Nearly one third of physicians ages 60-69 bicycle and 23% run and jog. • 64% are avid book readers. • Gourmet cooking, walking for health and watching television are top interests of this group.

For the full report and more details on each age group, visit *amainsure.com/worklife2014*

About the Survey: The national survey was sent to 125,000 practicing U.S. physicians up to age 69 in October 2013. The respondent profile (N=4,950 physicians) showed almost equal representation across age segments (24% ages 30-39; 25% ages 40-49; 29% ages 50-59; 22% ages 60-69); a 62-38% male to female ratio; and 29% in family medicine and internal medicine, 11% in pediatrics, 7% in obstetrics/gynecology and 53% in other specialties and sub-specialties. Survey data was collected through Qualtrics®. There was an overall 95% confidence interval with a margin of error +/- 4%.

AMA Insurance Agency, Inc., specializes in meeting the insurance and financial services needs of America's 1,000,000 physicians, both AMA members and non-members. For more information, visit www.amainsure.com.

because DOCTORS are different

AMA INSURANCE

$1.6 trillion, 10 million jobs:
Study shows physician impact on economy

Each physician in the United States supports 13.84 jobs on average and contributes $2.2 million in economic output, underscoring how physicians influence the health of both their patients and the economy, according to the AMA's new Economic Impact Study.

The study, prepared by IMS Health and released this week, focused on the roughly 720,000 physicians who primarily engage in patient care activities, as opposed to those who focus on research or teaching. Nationally, these physicians support $1.6 trillion in total economic output—that's $2.2 million per physician—and 10 million jobs.

The study also found that:

- Physicians support $775.5 billion in wages and benefits at the national level.
- Physicians contribute $65.2 billion in total state and local taxes nationally, or $90,449 in local and state tax revenue per physician.

The study estimated the total economic impact of patient care physicians at the national level and for each of the 50 states and Washington, D.C., measuring output, jobs, wages and benefits, and state and local tax revenue. At the national level, physicians support greater economic output than the following industries: legal services, home health care, higher education and nursing home and residential care.

"Physicians carry tremendous responsibility as skilled healers, trusted confidants and patient advocates, but their positive impact isn't confined to the exam room," said AMA President Ardis Dee Hoven, MD, in a statement.

"The new AMA study illustrates that physicians are strong economic drivers that are woven into their local communities by the commerce and jobs they create," Dr. Hoven said. "These quality jobs not only support the caring role of physicians, but also pay taxes that support schools, housing, transportation and other public services in local communities."

#KnowTheImpact: Visit the Economic **Impact Study Web page** to access an interactive map and see a specific break-down of economic contributions for each state.

Together We're Helping Health Happen

We seek to "help health happen" by expanding access to care for at-risk and underserved populations globally through our focus on three areas:

- Wellness, prevention, treatment, and education
- Emergency preparedness and relief
- Building capacity in the training of professionals and the delivery of health care services

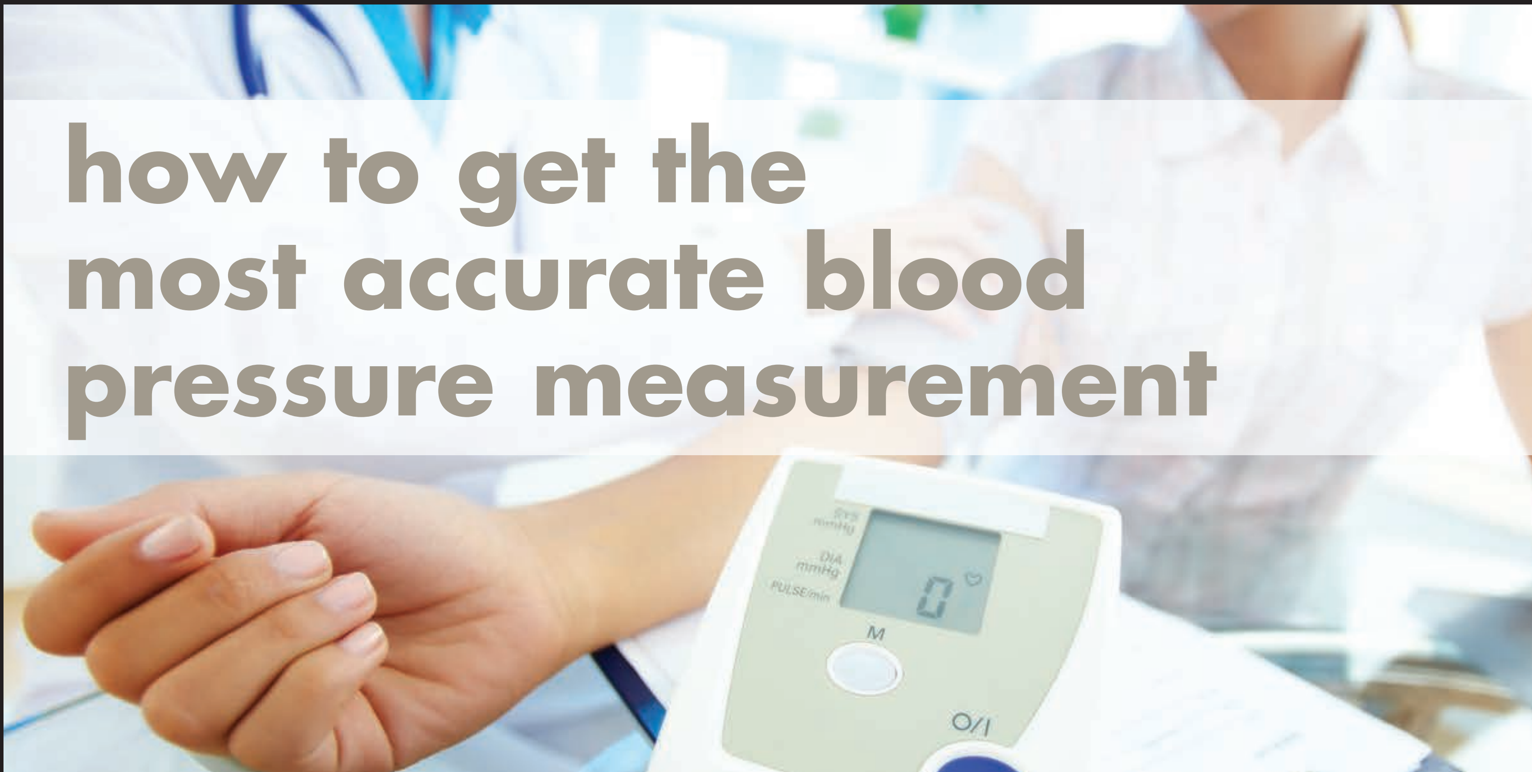

Healthy Lifestyles, Healthy Communities

We continue to expand our Healthy Lifestyles, Healthy Communities program, increasing service to more than 8,500 children and their caregivers in 14 cities across America. Through a partnership among the National Association of Community Health Centers (NACHC), Henry Schein Cares, and community clinics, we supply medical products, provide event support and increase awareness about the leading health concerns facing underserved children, from asthma to obesity, with screenings and wellness education.

how to get the most accurate blood pressure measurement

As a standard part of many physicians' office workflows, measuring blood pressure may seem routine. But seemingly minor issues can impact blood pressure measurement, artificially inflating a patient's blood pressure by anywhere from two to 40 mmHg.

Now is a good time to reevaluate blood pressure measurement processes and talk to patients about managing their high blood pressure. Here are several ways you can make sure a patient's blood pressure is accurately measured:

1. The patient's feet are flat on the floor, and legs are uncrossed.
2. The patient's arm and back are properly supported.
3. The patient doesn't need to use the restroom and can comfortably remain still.
4. The patient's arm is bare, and the sphygmomanometer cuff is on skin, not over any clothing.
5. The patient is not speaking and has had at least three minutes of quiet time prior to the measurement.

Taking the checklist approach to blood pressure management can help ensure quality care in screening for and treating patients with high blood pressure, preventing the development of heart disease and stroke down the road.

If a patient talks during the measurement, for example, or if the patient's feet aren't flat on the floor, there's a chance that blood pressure measurement will give a falsely high reading. This could lead to a prescription for an unnecessary, potentially harmful, medication. At the same time, other factors can contribute to unidentified and untreated hypertension, which can be deadly.

Incorporating these standardized principles into practice workflows is a key element of the AMA's Improving Health Outcomes initiative. A pilot program involving multiple clinical sites in two states is implementing principles of safe

design into the ambulatory setting to improve outcomes around hypertension. Similar approaches, such as hospitals using checklists to reduce central-line infections, have seen successful results.

Common problems that account for inaccurate blood pressure measurement

When the patient has...	*BP can appear higher by...*[1,2]
A full bladder	10–15 mmHg
An unsupported back	5–10 mmHg
Unsupported feet	5–10 mmHg
Crossed legs	2–8 mmHg
Cuff over clothing	10–40 mmHg
Unsupported arm	10 mmHg
A conversation or is talking	10–15 mmHg

1. Pickering, eta/. Circulation 2005
2. O'Brien, eta/. Blood Press Mon. 2002

Taking the checklist approach to blood pressure management can help ensure quality care in screening for and treating patients with high blood pressure, preventing the development of heart disease and stroke down the road.

To apply safe design principles to blood pressure management, the AMA is collaborating with researchers at Johns Hopkins University and the pilot sites to develop and test a set of evidence-based recommendations, based on a simple framework called the M.A.P. for achieving optimal hypertension control:

- Measuring blood pressure accurately every time its measured
- Acting rapidly to address high blood pressure readings
- Partnering with patients to promote self-management of high blood pressure

The pilot sites are integrating best evidence into each step of the M.A.P. framework. For example, the AMA is incorporating successful elements of a program at Johns Hopkins Center to Eliminate Cardiovascular Health Disparities in designing resources to help practices engage patients in better self-management.

For additional resources to use in your practice, visit ama-assn.org/go/hypertension.

how to determine whether your patients have prediabetes

While 29 million Americans have diabetes, another 86 million adults are on the path to developing the disease because they have prediabetes. These **new estimates** from the Centers for Disease Control and Prevention (CDC) underscore the urgency of screening patients for prediabetes to help them avoid becoming a statistic.

People with prediabetes are at increased risk for developing type 2 diabetes as well as heart disease and stroke. The good news is that prediabetes is a reversible condition. That's why screening is so important.

Blood test levels for diagnosis of diabetes and prediabetes

	A1C percent	Fasting plasma glucose (mg/dL)	Oral glucose tolerance test (mg/dL)
Diabetes	6.5 or above	126 or above	200 or above
Prediabetes	5.7 to 6.4	100 to 125	140 to 199
Normal	About 5	99 or below	139 or below

For additional resources to use in your practice, visit **ama-assn.org/go/prediabetes**

People with prediabetes have blood glucose levels that are higher than normal but not high enough to be diagnosed as diabetes. Prediabetes has no clear symptoms, but some individuals with prediabetes have signs of type 2 diabetes, such as intense feelings of thirst.

Physicians can use a few different ways to test for prediabetes, including the A1C test, fasting plasma glucose (FPG) test or oral glucose tolerance test (OGTT). A1C results of 5.7 to 6.4 percent, FPG levels of 100 to 125, or OGTT levels of 140 to 199 indicate prediabetes.

Codes to use when reporting prediabetes and diabetes screening are listed in the chart below.

The AMA is focusing on prediabetes through its **Improving Health Outcomes** initiative, working toward systematic prevention of diabetes to save lives, improve health and reduce health care spending.

A **pilot program in partnership with the YMCA**, currently taking place at locations in three states, will establish a process for physicians to increase screening for prediabetes and refer patients to the YMCA's Diabetes Prevention Program in their communities.

Visit the CDC's **National Diabetes Prevention Program website** to find out whether an evidence-based diabetes prevention program is available in your community.

Codes: When screening for prediabetes and diabetes

CODES FOR PREDIABETES AND DIABETES SCREENING[†,††]

ICD-91or diabetes screening		**CPT tor diabetes screening tests**	
VT7.1	Diabetes Screening	CPT 82947	Fasting Plasma Glucose Test
790.2	Abnormal Glucose	CPT 82950	Post-meal Glucose (2-hour plasma glucose 2hPG; 2 hr specimen)
790.21	Impaired Fasting Glucose	CPT 82951	Oral Glucose Tolerance (3 specimens with 2 hr value included)
790.22	Impaired Glucose Tolerance (oral)	CPT 83036	Hemoglobin A1C
790.29	Other Abnormal Glucose NEC	CPT 83036QW	Hemoglobin A1C (used for POC test that is CLIA waived [-DCA]
278.00	Obesity		
278.02	Overweight		

These codes may be useful to report services/tests performed to screen for prediabetes and diabetes.

TOPICAL SKIN ADHESIVE

Sterile, 0.5-mL Single-Patient-Use Plastic Ampules

The proven choice of wound closure with over 40 years of clinical experience, this FDA-approved liquid adhesive consists of n-butyl-2 cyanoacrylate.

- Highest bond strength of all topical tissue adhesives on the market
- Won't clog or dry out when opened
- Provides a precise, controlled application
- Inhibits growth of bacteria
- Available in dyed and clear versions

(112-6111)	Blue	ea
(112-6106)	Clear	ea
(112-6933)	Flexible	ea

Introducing the new addition to our family of skin adhesives:

Our FLEX product
- For longer incisions
- Provides a more flexible coverage
- Generates less heat during polymerization

Rely on Us™ — Rely On Us for Quality, Selection and Performance.

HENRY SCHEIN®
DISPOSABLE VAGINAL SPECULA
Recommended for routine gynecological exams.
- Allows examination of vaginal mucosa at a 360° angle without rotation
- Provides wide range of adjustability (angular and elevation adjustments)
- One-handed manipulation for ease of operation
- Self-holding in various opening positions
- Decreases risk of contamination
- If needed, apply lubrication for better comfort during examination
- Made of hard, clear, nontoxic, high-strength plastic resin

HENRY SCHEIN®
DISPOSABLE VAGINAL SPECULA–LIGHT SOURCE COMPATIBLE
Disposable specula are made of high-strength, clear, nontoxic plastic. Allow examination of the vaginal mucosa at 360° angle without rotation. Provide wide range of adjustability (angular and elevation adjustments), ease of operation and manipulation with one hand. Self-holding in various opening positions. Single use of speculum decreases the risk of cross contamination. Compatible with corded light source of leading brands, eliminating the need for positioning a light source independently.

HENRY SCHEIN®
SUTURE REMOVAL KIT–PLASTIC
Sterile, single-use kit. Plastic-handled Littauer scissors with plastic thumb forceps. Flatter, thinner-blade scissors provide easier suture removal by allowing blade to slip under suture.

(900-4687) ....ea

Contains: 1 pair of Littauer (hook-tipped) scissors, 1 pair of PosiGrip™ plastic forceps & 1–3" x 3" gauze sponge.

HENRY SCHEIN®
SUTURE REMOVAL KIT
All items are sterile and latex-free.

(112-5822) ....ea

Contains: 1 pair of small-loop, 4½" straight metal iris scissors; 1 pair of serrated, 4¾" metal forceps; 1–3" x 3" gauze pad; & 1 large alcohol prep pad.

HENRY SCHEIN®
NON-FENESTRATED DRAPES
Sterile
Polylined, Nonfenestrated, Tissue/Poly/Tissue

Blue, 18" x 26"
(900-4686) 50/box

- Heat sealed along 2 outer edges to ensure a pinhole-free plastic layer that guarantees maximum protection against bacterial strike-through from below
- Features polyethylene lining between 2 layers of absorbent-strength tissue, virtually eliminating risk of bacterial migration and strike-through
- Using blue-tissue side up prevents glare
- All sterile fields are available in convenient dispenser boxes of 50 each

HENRY SCHEIN®
FENESTRATED DRAPES
Sterile, with 3" Round Fenestration, Tissue/Poly/Tissue
- Allows access to the operative site while it protects surrounding area
- 3" round fenestration option is die cut and heat sealed, leaving a smooth, even edge that prevents linting
- Blue/white combination for antiglare
- Generously sized
- Individually packed, 300 per case (6 dispensers of 50 each)
- Latex-free

Blue, 18" x 26"
(900-4685) 50/box

HENRY SCHEIN®
DISPOSABLE SKIN STAPLER–35 WIDE
Our disposable skin stapler is specially designed for surgical skin suturing. With novel structure and application security, it has the advantages of quick speed when sewing up during operation, modest histological reaction, and good wound matching and healing. It enables you to work with higher efficiency and assists in avoiding cross infection effectively. There is no pain during removal, and scarring is minimal.

InControl™
INFECTION PREVENTION SOLUTIONS
Q4 Focus
Needlestick Injury Prevention:
Strategies to Protect the Staff from Infection & Keep the Practice Compliant to Regulatory Requirements
Objectives:
• Review data on the risk of sharps injury in the physician practice setting
• Discuss why it is as important as ever to prevent bloodborne exposures for both staff safety and regulatory compliance
• Explore research on effective ways to reduce needlestick injury and how they can be applied to medical practices and outpatient clinics
• Provide recommended actions the Practice can take today to reduce the risk of sharps related injuries
Prerecorded Presentation Available till February 2015

The Test Results Are In!

SurGuard®3 Safety Needles & Syringes are the *sharper* choice!

With 3 ways to activate and a broader range of sizes than most other brands, SurGuard®3 is the industry's most adaptable safety needle. Add separate thumb and finger grips, unequalled sharpness, and competitive pricing, and you'll understand why we say SurGuard®3 is the one needle that fits *every* clinician's style. Plus, SurGuard®3 has the sharpest needles among major brands tested.*

- 10% sharper than similar needles from other leading brands
- More comfortable injections for patients

Bottom line: No matter what you're looking for in a needle, you're looking for SurGuard®3.

For more information, contact your Henry Schein Representative.

BD Veritor™ System

- Proven performance vs. PCR
- Unique Adaptive Read Technology provides reproducibility you can count on
- Easy-to-read digital display eliminates subjective interpretation and delivers the "Trusted Answer"
- Convenient workflow with minimal hands-on time

#256055, BD Veritor™ System Reader
(992-0003) ....ea

#256055, BD Veritor™ System Reader
A rapid chromatographic immunoassay for use with symptomatic patients. This CLIA-waived kit is to be used with the BD Veritor System Reader to test nasal and nasopharyngeal swab samples that are freshly collected, processed and dispensed directly onto an assay test device.

#256045, CLIA-waived BD Veritor™ System Flu A+B Kit
(992-0002)................................30 tests/pkg
CPT® Codes: Influenza A: 87804QW† / Influenza B: 87804-59†; Using the Objective and Differentiated Reader System: 87999†

BD Veritor System RSV CLIA Waived Kit

The first CLIA-waived RSV test referenced against a higher sensitivity standard than culture. Test device is ready to insert into reader 10 minutes after sample is added. The same sample processed for RSV can also be used for flu A+B. Digital results displayed in 10 seconds.

#256038
(121-7553) 30/box
CPT® Code: 87807QW†

BD Veritor System Group A Strep Test

The first CLIA waived digital immunoassay (DIA) for the rapid detection of Group A strep (GAS) with an instrumented result. Test device is ready to insert into reader 5 minutes after sample is added. Once the test device is inserted in the reader, an objective, digital test result is displayed in 10 seconds.

#256040
(992-0006) 30/box
CPT® Code: 87880QW†

BinaxNOW® Influenza A & B Tests

Rapid test for identification and differentiation of influenza A and B, using specimen collected by nasal washes/aspirates, nasal swabs and nasopharyngeal swabs.

- CLIA waived
- Differentiates types A and B on the same card
- Sensitivity (A/B): 70–89%/50–69%
- Specificity (A/B): 90–99%/94–100%
- Easy to use: no additional reagents needed
- On-board extraction
- 15-minute results
- Same specimen can be used with BinaxNOW® RSV test
- **Made in the USA**

#416-022
(153-9781) 22/box

OSOM® Influenza A & B Tests

In vitro diagnostic test for the qualitative detection of influenza A and B antigens.

#190
(106-3126) 27/box

- Differentiates between influenza A and B
- Sensitivity (A/B): 73.8%/60%
- Specificity (A/B): 96.4%/96.4%
- Easy to read: 3 distinct lines
- Nasal swab specimens
- Less than 1 minute hands-on time; results in 10 minutes
- Room-temperature storage
- Moderately complex
- 2 extra test sticks included for external QC testing
- **Made in the USA**

#191, Influenza A & B Control Kit
(106-3132) ....ea
CPT® Codes: Influenza A and B, 87804-59†

OSOM® Ultra Strep A Tests

Ultrasensitive strep A test with the ease of use and rapid results your busy practice needs. Studies show the sensitivity of OSOM Ultra Strep A test and the standard single-swab culture method are not statistically different.

- CLIA waived
- Easy to use
- Easy-to-read, 2-color results in minutes
- Sensitivity: 92.6%
- Specificity: 92.8%
- Room-temperature storage
- Includes positive and negative controls
- **Made in the USA**

#147
(392-7389) 25/box

#149 (Includes 2 additional tests for external QC testing.)

SIEMENS

Clinitek Status+ Urine Analyzer

Provides convenient point-of-care testing with improved data integrity for more confidence in the results. Simple, fast, and accurate testing produces a result in about 60 seconds. Status analyzer can process basic urine strips, ratio tests, and hCG cassette tests. Full alphanumeric keyboard, easy-to-use touch-screen display, and automatic strip identification make this unit convenient to use. Eliminates need for visual reading, timing errors, and transcription errors. Memory to store 950 patient records. Future-ready for EMR when you are.

#1780
(795-0055) ....ea

SIEMENS

Clinitek® Microalbumin Test Strips

- CLIA waived on CT status analyzer
- Dip-and-read test for albumin and creatinine in urine
- Determines an A:C ratio for greatest accuracy
- Use a random urine sample–reduces need for a 24-hour collection
- Timeframe: 60 seconds
- **Made in the USA**

Alere™

Afinion™ Test System

The Afinion™ AS100 Analyzer provides valuable near-patient testing for today's health-care professionals. It utilizes the latest technology and provides a simple, fast, and reliable method to monitor patients' disease progression.

- Multi-assay analyzer system
- 3-minute HbA1c, CLIA-waived
- 5-minute albumin/creatinine ratio (ACR)
- Short test time provides the opportunity for more timely treatment changes
- Easy sample collection and operation, minimal training required
- Reliable, lab-quality results
- No manual calibration required
- Unique integrated fail-safe system
- Allows for input of patient and operator IDs

HEMOCUE®

HemoCue® Albumin 201 System

Can be used for quantitative determination of low levels of albumin in urine for the purpose of screening, diagnosis, monitoring, and supporting clinical evidence in the treatment of microalbuminuria. The system consists of a small, specially designed analyzer and individually packaged microcuvettes containing freeze-dried reagent.

Albumin Microcuvettes
(111-5591) 50/box

HEMOCUE®

Hb 201+ Handheld Hemoglobin Analyzer

- Produces results in less than 1 minute with lab-quality accuracy
- 3 easy steps
- Precalibrated, portable analyzer that requires minimal maintenance
- No calibration or instrument manipulation (between cuvette/reagent batches) is needed
- Safe and easy to use
- Reimbursable
- CLIA '88 waived
- 2-year warranty

Analyzer
(345-2344) ....ea
Contains: analyzer, AC adapter, manual & training CD-ROM.

#3201 Microcuvettes
(110-9167) 100/box
Contains: 4 packs of 25.

(345-8733) 200/box
Contains: 4 packs of 50.

Alere™ Cholestech LDX® System
Complete Lipid Profile, Glucose
Lab-accurate lipid profile, glucose, ALT, AST, and hs-CRP results in about 5 minutes* from a simple fingerstick. Allows provider to get results while patient is still in office—provider can counsel and intervene face-to-face. This improves patient compliance and increases control and management of heart disease and diabetes. Reimbursable by Medicare and most private payers.

- CLIA waived**
- Procedure saves time and enhances productivity
- Small, tough, and portable
- Eliminates anxiety of venipuncture; requires only a fingerstick
- On-the-spot adjustment of therapy and improved patient compliance
- Accuracy comparable to laboratory tests
- Saves time: fewer follow-up visits required
- Enhances compliance through teachable moments between healthcare providers and patients

#10-959, Analyzer
(738-2917) ....ea
Contains: 1 of each: analyzer, printer, power supply, starter pack, optics check cassette, printer cable, user's manual, procedure manual & training video. Starter pack contains 200 lancets, 200 capillary tubes, 200 capillary plungers, 1 Minipette pipette, 50 pipette tips, 1 accessory tray & 1 fingerstick tip pad.

*6-minute results for hs-CRP.
**Except hs-CRP.

CoaguChek XS® System
PT/INR Monitoring Solution
The next generation in point-of-care prothrombotin (PT) and international normalized ratio (INR) testing, this new system uses exclusive smart technology to help ensure accurate results and offers the flexibility and control that health care professionals need to confidently manage a wide range of anticoagulated patients. It is the only system to perform onboard quality control and determine patient results in a single-test chamber.

- CLIA waived
- Neutralizes therapeutic levels of heparin and LMWH
- INR corrected for hematocrit within specified range; manage a broad array of patients with a single device
- Small sample size (10 µL) for easy dosing
- Strip allows dosing from either top or side for simple blood application
- Small, battery-powered, handheld meter for portability and efficiency
- Onboard controls; no external QC necessary
- Auto-on with strip insertion and auto-off capabilities
- 18-month strip shelf life; no refrigeration needed
- **Made in the USA**

XS® System

New and Now Available from Henry Schein!

THE FREND SYSTEM PSA & TSH TEST

NEW!
Call your Henry Schein Sales Consultant for more details!

NanoEnTek

FREND™ System

This quantitative immunoassay analyzer utilizes disposable kits to provide in-vitro diagnostic results for TPSA. The accurate, automated testing procedure—a simple, 3-step operation—provides results in 4 minutes. No need to batch your sample —run when you are ready. This fully automated device is equipped with an easy-to-use touch-screen interface. The FREND™ is compact and lightweight, allowing for portability.

- With electronic code-chip calibration, there's no need to run liquid calibrators
- Daily electronic system QC control takes only 1½ minutes

(455-0011) ....ea

PSAPlus Immunoassay Test

The PSA Plus cartridge is designed for insertion into the FREND™ System. It measures the level of prostate-specific antigen (TPSA) to aid in the diagnosis and to monitor (or manage) patients with prostate cancer. Provides fast and accurate quantitative in-vitro diagnostic of the protein in human serum or plasma based on the lab-on-a-chip technology.

- Test can be used with either plasma or serum samples
- Maximum reaction time: 4 minutes

(455-0013) 25/box

CPT® Code: 84153†

NanoEnTek

FREND™ TSH Test

Measures the level of thyroid stimulating hormone (TSH), assisting physicians in managing patients with thyroid disorders. Provides fast and accurate quantitative, in-vitro diagnosis of the protein in human serum or plasma based on the lab-on-a-chip technology. Disposable cartridge designed for insertion into the FREND system.

VITAMIN D & DRUGS OF ABUSE TESTING
NOW AVAILABLE!

HORIBA Medical

ABX Pentra 400 Analyzer Clinical Chemistry System

A compact, benchtop, clinical chemistry analyzer. Its autonomy and continuous loading provide enhanced productivity in a user-friendly environment. This very precise optical system meets the requirements of highly accurate photometric measurement. An extensive panel of liquid reagents simplifies workflow. Horiba presents a range of ready-to-use reagents in a single format.

- Up to 420 tests per hour with the ISE module
- 55 on-board assays with backup availability
- Save valuable time: control all of your operations from the main screen (system, reagent, and sample status), and easily upload target values for calibrators and controls
- Secure data management: Westgard multirule QC procedures with up to 3 default controls, full QC program stores up to 12 months of control history, Levey-Jennings, and statistics
- Conduct high-quality analysis: single-use reaction cuvette performs sensitive tests and all latex assays, high-performance mixer design mixes in minimal time without contaminating, and test-sequence setting program features an incompatibility function
- Control cost: optimized number of tests per cassette and limited calibrations

CryOmega®

Disposable Cryosurgical Device

Clinically effective direct spray of liquid nitrous oxide (-89°C/ -127°F) in a convenient and economical device.

- Colder and more effective than canister-based disposable systems
- Precise, concentrated spray, no accessories required
- Usually removes lesions in a single office visit
- Average treatment time is 10 seconds
- 240 seconds (4 minutes) total treatment time per unit
- FDA approved for broad range of non-malignant lesions
- Unit does not contact patient
- Shelf life of 2 years un-activated, at least 6 months activated
- Non-flammable, disposable
- High revenue stream, pays for itself in 3 treatments

CryOmega is a registered trademark of CryoConcepts, LP.
U.S. and International Patents Pending.

HENRY SCHEIN® MEDICAL | Rely on Us™

HENRY SCHEIN®

PRO PLUS SERIES CLOCKFACE ANEROIDS

Latex-Free

Each aneroid features:

- Large, easy-to-read 6" luminescent dial for high visibility in virtually any light condition
- 300mm-Hg, CE marked, no-pin stop movement withstands the heaviest use
- Inflation system includes black nylon cuff, latex inflation bladder, bulb and valve, and 8' length (when extended) of coiled latex tubing
- Contemporary Euro-style ivory casing complements any decor
- Complete with all necessary hardware and assembly instructions
- Available in wall or mobile configurations
- Assembled, inspected, and packaged in the USA from foreign components

Wall Aneroid also includes:

- Wall bracket that swivels through 110° rotation for easy viewing with integral cuff storage

Mobile Aneroid also features:

- Height-adjustable Spider-Leg™ caster stand with range of 34" to 48" (from bottom of base to top of unit)
- Integral ABS cuff-storage compartment
- Manometer is angled back 15° for easy viewing
- 18" base diameter

Adult, Black

PRO PLUS SERIES PROFESSIONAL STETHOSCOPE

Combination adult-size chest piece is precisely machined to exacting tolerances from surgical stainless steel for outstanding performance and rugged durability. Available in 3 striking colors for departmental coding or personal identification.

Latex-Free ....ea

Specify:
Black ....**(900-4815)**
Burgundy.........................**(900-4816)**
Navy...............................**(900-4817)**

- Extra-large bell (1⅜" diameter) for unsurpassed low-frequency response
- Ultrasensitive diaphragm (1⅞" diameter) for greater amplification and crisper high-frequency response
- Color-coordinated nonchill bell and diaphragm retaining rim for patient comfort
- Stainless steel binaurals with double-leaf internal spring fixed at 15° angle for greater comfort
- Reinforcing yoke molded into flexible 22" PVC "Y" tubing
- Deluxe PVC ear tips (in small and large) for the ultimate in wearing comfort and acoustic seal
- Spare diaphragm included
- Available in 3 striking colors for departmental coding or personal identification
- Scope ID tag included
- Lifetime warranty
- Weighs 6.5 oz
- Overall length 31"

HENRY SCHEIN®

PRO SERIES SPRAGUE SCOPE

Threaded chest-piece drum of chrome-plated zinc permits the use of 5 interchangeable chest-piece fittings—an adult and pediatric diaphragm as well as 3 bells (1¼", 1", and ¾")—for complete diagnostic capability in most patients.

HENRY SCHEIN® PRO PLUS SERIES PALM ANEROID

Latex-Free
This revolutionary palm-style manometer has an integral latex-free bulb and trigger-style air release valve for one-hand convenience.

Features:

- Precision-crafted, 300mm-Hg, CE-marked, no-pin stop movement tested to 50,000 cycles
- Movement housed in a zinc safety cage for unsurpassed durability
- Ambidextrous infinite control trigger-release air valve
- Nylon cuff with proprietary size guide marking system, to prevent miscuffing
- Dip-molded latex inflation bladder withstands heavy use
- Quick-release Luer-slip connector

Assurance 50® "Fade-Resistant" Papers

Single Channel, Red Grid

Unique line of thermal recording media. Look and feel is similar to standard thermal charts, but difference is in acid-free base paper and patented chemical thermal coatings. Combination of these 2 elements works to deliver 50 years of ECG image life without worry or fading. Thermal chart contaminants such as UV light, PVC, alcohol, adhesive tape, and electrode creams are no longer of concern. No special care or handling is required. Guarantee clear, indelible original records, year after year.

BURDICK

Burdick ELI™ 280 Touchscreen Electrocardiograph

Compact and lightweight, the ELI™ 280 electrocardiograph provides comprehensive functionality in a portable, touchscreen device. The easy-to-use ELI 280 is designed to meet the demands of high-volume ECG environments. 10¹⁄₁₀" high-resolution color LCD, with convenient touchscreen, displays up to 12 leads of ECG data for immediate review and plotting. Widely recognized Mortara resting-ECG interpretation algorithm uses gender-specific and adult and pediatric criteria to provide a silent second opinion for resting ECG interpretation. ELI 280 offers a choice of either the innovative WAM™ wireless acquisition module or the AM12™ acquisition module. Both include replaceable lead wires, lead fail indicator, and remote control with buttons for ECG acquisition and rhythm printing. ELI 280 incorporates Mortara's unique Best 10 feature, which automatically selects and displays the best 10 seconds of ECG from memory, reducing the need for repeat ECGs caused by patient movement or other sources of ECG artifact. ELI 280 easily integrates with cardiology management systems for increased efficiency and optimized workflow. With automatic time sync and the ability to obtain orders and reports with a single touch, the ELI 280 can save user time and effort. Experience the benefits of bidirectional communication via internal modem, LAN, or wireless LAN with Mortara's E-Scribe™, as well as third-party PACS systems via XML, PDF, UNIPRO32, and DICOM®.

SureTemp® Plus 690 Electronic Thermometer

Combines the speed of ear thermometry with the accuracy and reliability of traditional oral thermometry. Takes fast, 4–6-second oral temperatures, 10-second pediatric axillary and rectal temperatures, and 15-second adult axillary temperatures.

- Accurate to within ± 0.2°F (0.1°C)
- Interchangeable, removable probe wells to reduce the risk of cross contamination
- Large LCD that can display temperatures in Fahrenheit or Celsius
- Last-temperature recall
- Mode selection and recall buttons
- Four different temperature modes
- Convenient storage for 25 probe covers
- Takes about 6000 readings on 3 AA batteries (included)

athenahealth
Cloud-based EHR, practice management and care coordination services

HENRY SCHEIN® MEDICAL

*If Henry Schein customers purchase services or products from a promoted services or products organization, Henry Schein will earn a fee from such organization.

** The two free months of athenaOne offer is available to any practice that: (a) is comprised of six physicians or less; (b) signs an initial contract for the provision of athenaOne® services on or after July 1, 2014, and no later than September 30, 2014; (c) pays a $1,225 deposit per physician, which will be credited back to that practice after it goes live on that service; (d) goes live on the athenaCollector® service within six months of the effective date of the contract; and (e) uses athenahealth's online implementation process. One service fee credit for the first two months of service will be issued to each qualifying practice; this promotion may not be combined with any other promotional offer and may be modified or canceled at any time at athenahealth's sole discretion. Additional terms, conditions, and limitations may apply.
